

Oaklands College Badminton Programme in association with Hertfordshire Badminton

Oaklands College looks forward to working with Hertfordshire Badminton on this new and exciting opportunity.

As a college we will be supporting the partnership by offering a combined coaching and academic programme of study. This offers learners access to daily Badminton coaching sessions as well as to a variety of academic programmes. This might be A Levels, BTEC Diplomas in Sport and Exercise Science, Development, Coaching and Fitness or a Level 2 Diploma in Sport.

Oaklands has a strong track record of developing student athletes in rugby, football, basketball and athletics and we are really excited about this fantastic opportunity to give Badminton players the chance to maximise their talent and progress on to county, regional and national team level. Students on the Badminton programme will be accessing high quality coaching (twice a week), strength and conditioning (twice a week), sports science and sports medicine support on a daily basis, all of which are integrated into their main academic programme of study.

Our ambition is quite simply, to have the best Badminton academy in the country. The partnership between Oaklands College and Hertfordshire Badminton gives us the opportunity to genuinely help aspiring junior players to fulfil their ambitions both on the court and in the classroom. We aim to inspire them to live by the core values of teamwork, work ethic, and respect.
